# LUMISPLASH™

Decorative laminates with LED edge lighting  
incorporated in an ultra-thin panel

[ATILaminates.com/LumiSplash](http://ATILaminates.com/LumiSplash)

## IDEAL APPLICATIONS

Backsplashes + Islands

Tabletops

Art + Signage

Commercial

Ceilings + Light Fixtures

Accent Strip Lighting

## WHAT IS LUMISPLASH?

LumiSplash™ is a patent pending, multilayered, ultra-thin 1/4" (6mm) decorative laminate that emits light evenly across its surface and has impressive impact, scratch, chemical, and abrasion resistant properties. LumiSplash is:

- The first ultrathin, lighted laminate system with no air gap required for LEDs. This system uses a Light Bar (LB) and Light Guide Panel (LGP) to produce luminance across a translucent LuxCore surface
- A one-of-a-kind product that combines art with lighting in a durable laminate, creating a unique focal point for any home or business
- Available in kit form with all the necessary hardware supplied for installation. Compared to other products on the market, that require extensive fabrication and set-up, LumiSplash saves time and money
- Suitable for most vertical and horizontal applications where high other pressure laminates could be used
- Easily fabricated with standard woodworking tools such as routers, saws and drills

### SIZES

- Available in standard heights of 6" (152 mm), 16" (406 mm), 24" (610 mm) and 48" (1220 mm), and in lengths of 48" (1220 mm) and 96" (2440 mm)
- LumiSplash Accent Strip Lighting comes in heights of 6" (152 mm) and in lengths of 48" (1220 mm) and 96" (2440 mm)
- Custom lengths can be made to order, or they may be cut on site to smaller dimensions from stock panels

### ACCESSORIES

-  1½" edge profile (welded and powder coated) comes in 8' lengths and many common table sizes (square, rectangle and round)
-  Dimmers
-  Filters to change light temperature
-  RGB LED Light Changing System
-  Snap frame (various channel molding)
-  Battery powered system 
-  Transformers

Ultra-thin and lightweight

Can withstand 9,150 abrasion cycles meeting NEMA standard LD3-2005

Chemical, stain, impact, scratch and abrasion resistant FRP surface

Customizable with interchangeable graphics system

A variety of edging, frame and mounting systems available

Value engineered for maximum functionality and design

Easy on-site fabrication allows for accurate outlet and sink cutouts, as well as the ability to cut-to-size

# BACKSPLASHES + ISLANDS

LumiSplash backsplashes and islands help enhance new or existing kitchen designs while adding decorative light. It is simple to trim-to-size, cut-out outlets and more at the jobsite without affecting luminance.

Using art from our large stock library or your own design, you can create a one-of-a-kind look with LumiSplash that brings the art to life.

# TABLETOPS + BAR TOPS

LumiSplash tabletops and bar tops can transform an ordinary piece of furniture into a functional, illuminated work of art. Unique as they are beautiful, these laminates provide soft light that may be dimmed to serve as either task or ambient light.

HEDGEROW INDIGO

LumiSplash tabletops utilize our multilayered panel system, graphics and edging system. Our welded and powder-coated edging systems create a flawless, complete look. Bar tops and counters can utilize custom mouldings to create various effects. When running electricity is not feasible, use our long-lasting, rechargeable battery system to supply light for 8-10 hours.

Our RGB LED Light Changing System provides a smooth lighting transition from red to green to blue, creating a beautiful ambience for your space.

# COMMERCIAL APPLICATIONS

Express your company’s values and culture in a memorable way with LumiSplash. Create a picture perfect look to capture your guests’ attention, and make their visit unique and inviting.

Lighting and color are integral parts of your spa or bathroom environment. An optional dimmer accessory allows you to tailor the room’s ambiance with a simple adjustment.

BIRCH FOREST

DAY

NIGHT

LumiSplash’s interchangeable graphics systems synchronized with current promotions is an excellent way to leave a lasting impression with your guests. LumiSplash blends the day-to-night transition with even, consistent lighting for any space.

# CEILINGS + LIGHT FIXTURES

Why settle for ordinary when you can achieve extraordinary with LumiSplash ceilings and light fixtures?

GREEN LEAVES

As the fifth wall in design, your ceilings offer an added opportunity for customization. Create the illusion of windows or skylights to help the environment feel more relaxed. Consider LumiSplash for suspended systems to become a functional focal point for any room.

# ART + ACCENTS

Bring beautiful works of art to life and create memorable impact that people won't soon forget.

ATI CUSTOM DESIGN

Use any of our LumiSplash applications for brand emphasis and stand out from the crowd in a variety of industries – hospitality, commercial, healthcare and institutional, and retail. LumiSplash can be as thin as 1/4" so you can achieve a low-profile look or build it out with framing to be a more pronounced statement.

ATI CUSTOM DESIGN

# INTERCHANGEABLE GRAPHICS

LumiSplash's interchangeable graphics face can easily be removed and replaced with new designs making it possible to change out looks as season, mood or design preferences change.

While a ATI's own creative image library is available, we invite you to work with your ATI sales associate to discuss your vision and have a custom LumiSplash design created for your next project.

This homeowner installed a photographic 24" x 36" LumiSplash panel to help complete the design of her basement wine cellar. Her contractor designed a custom wood frame over a buffet to display the system. Not only does the luminance create the desired ambiance, she can also change out the graphics quickly and easily to refresh the décor.

# HOW TO ORDER

## FRAMES + MOULDINGS

Due to LumiSplash's ultra-thin multi-layered laminate construction, it is usually necessary to encapsulate its edges with frames or mouldings. Heat dissipation is also necessary for LED longevity. ATI's frame solutions have heat dissipation built-in.

ATI offers various edging and framing solutions that provide the proper aesthetic and technical solution for every application.

Customers may consider picture frames, wood, solid surfacing, leather and other mouldings to add design appeal to tables, wall art, backsplashes, and countertops, etc. Working with ATI technical staff will ensure that custom solutions meet all of LumiSplash's requirements.

# GET LUMISPLASH IN 4 EASY STEPS

- 1

Consultation + Technical Review

Due to the custom nature of LumiSplash, every project begins with a conversation. Consulting includes detailed evaluations providing solid recommendations and solutions. We provide assistance in identifying and recommending LumiSplash solutions tailored to fit your specifications and requirements.
- 2

Graphic Selection

Not all images are created equal. The right image paired with your LumiSplash system can capture attention and add new dimension to your design. You may provide your own print-ready art, choose from our existing art library, or provide material for our in-house graphics specialist to build upon.
- 3

Design + Sampling

At this stage, our designers and production staff optimize files for printing and final output. You'll receive samples to reflect image quality, substrate nuances, and color. It's important to look at image details critically, with an eye on how the sample will look both lit and unlit.
- 4

Fabrication + Installation

It's now time to make your concept a reality. Once we receive the green light to proceed, we print your graphics on LuxCore FRP and assemble the components of your LumiSplash kit. You'll receive a carefully packed shipment via common courier with instructions for installation. Should any issue arise, you may call ATI for additional assistance.

DAY

NIGHT

BIRCH

LumiSplash looks great illuminated day or night. Daytime lighting allows for a soft, subtle glow to fill the area, creating a warm, inviting environment. At night, the image really pops, showing off the design while providing plenty of luminance.
